Pella® 250 Series VINYL

Innovative and enhanced security and privacy features for your customers peace of mind.

Double-Hung

ENHANCED SECURITY AND PRIVACY

Give your customers more peace of mind with innovative security and privacy features. Double- and single-hung windows are designed with an interlocking checkrail, steel hardware reinforcement and a unique anti-jar sill. Sliding patio doors feature an integrated footbolt, tamper prevention system and blinds-between-the-glass.

STRONGER FRAMES THAN ORDINARY VINYL

Pella's precision welding process creates more durable products that resist warping or twisting over time. Pella 250 Series window frames are 52% stronger than ordinary vinyl.¹

PELLA'S FADE-RESISTANT VINYL FORMULA

Pella 250 Series is made of high-grade vinyl that resists yellowing and never needs painting. The solid color throughout the vinyl keeps minor dings and scratches virtually invisible. Solid-color frames are available in White, Almond and Fossil.

EXCLUSIVE WEATHER PROTECTION SYSTEM

Protect your home with our exclusive weather repel system on single- and double-hung windows. It has three points of protection to channel water away from the home — including triple weatherstripping.

ENERGY STAR® MOST EFFICIENT 2022 WINDOW²

Upgraded triple-pane glass windows are on average 62% more energy efficient than single-pane windows.³ Pella 250 Series offers products that have been awarded the ENERGY STAR Most Efficient Mark in 2022.²

DURABLE LAMINATE EXTERIOR FINISHES

Dual-color frame options offer White interiors with Brown or Black laminate exterior. Pella's vinyl laminate is 2.6x more durable than painted vinyl.⁴

FREE-FORM MULLING CAPABILITIES

Create a large or unique combination for your project by mulling standard and custom-sized windows together. Combinations are factory-mulled and arrive ready for installation.⁵

OPTIONAL PERFORMANCE ENHANCEMENTS

Increase energy performance and structural strength with optional performance enhancements such as foam insulation and steel reinforcement.

ADDITIONAL FEATURES AND OPTIONS

We have the features and options that fit most any project. Choose from multiple frame types, dual- and triple-pane glazing, several grille options and a full lineup of window & patio door styles.

LIMITED LIFETIME WARRANTY

Pella products are backed by some of the strongest warranties in the business. See written limited warranty for details, including exceptions and limitations, at pella.com/warranty.

TESTING BEYOND REQUIREMENTS

At Pella, our products are tested beyond requirements to help ensure they have long-lasting performance and reduce call-backs for you.

AVAILABLE IN THESE WINDOW & PATIO DOOR STYLES:

WINDOW LIMITED
OPENING DEVICES

A vent stop can be engaged or disengaged manually and restricts how far the bottom sash of a single- or double-hung window can open. A window opening control device (WOCD) complies with a safety standard and allows for ventilation, emergency escape and rescue when released. A WOCD automatically limits the sash opening to less than four inches, unless it is intentionally disengaged, enabling the sash to fully open. Stainless steel limited opening devices are available on casement and awning windows, and WOCDs are available on casement windows.

ESPRESSO

¹ Based on the force required to bend a window frame profile.

² Some Pella products may not meet ENERGY STAR® guidelines in Canada. For more information, contact your local Pella sales representative or go to energystar.gc.ca.

³ Window energy efficiency calculated in a computer simulation using RESFEN 5.0 default parameters for a 2000 sq. foot existing single-story home when comparing a Pella 250 Series vinyl window with InsulShield Advanced Low-E triple pane glass with argon to a single paned wood or vinyl window. The range of energy efficiency will vary from 54% to 77% and will vary by location. Your actual savings will vary. The average window energy efficiency is based on a national average of 94 modeled cities across the country with an adjustment based on population. For more details see pella.com/methodology.

⁴ The abrasion resistance of Pella painted and laminate vinyl samples were tested and coatings compared in their ability to withstand a volume of abrasive materials using test method of ASTM D968.

⁵ Actual mullion span and combination size availability depends on design pressure requirements. Consider combination size, weight, and jobsite handling during design.

⁶ 86" height is only available up to a 53.5" width with a cam-action lock and a 3/3 glass in an equal sash split.

⁷ 96" height is only available up to a 53.5" width in Contemporary sash split with 3/3 glass and a cam-action lock or AutoLock.

⁸ Only available in the West region.

⁹ Additional configurations available. Contact your local Pella expert for details.

¹⁰ Exterior is an applied color, not an extruded color.

¹¹ Appearance of exterior grille color may vary depending on the Low-E insulating glass selection.

¹² To achieve a Grade 40 rating on ASTM F842, a test for forced entry excluding glass breakage, the optional footbolt must be installed and engaged.

¹³ Availability may vary by size. Contact your local Pella expert for more information.

¹⁴ Available on dual-pane products only. Not available on sliding patio doors with grilles-between-the-glass.

NOTE: Product specifications may change without notice.

Actual colors may vary from those shown and products may vary slightly from illustrations and photos

SHELLSTONE

EXPOSED COQUINA-SHELL FINISH

WHITE

Shellstone pavers are a ground-face product that blends oyster shells and coquina with our standard paver formula. The pavers are then ground to expose the shells and aggregates inside, creating an exposed coquina-shell finish with an airy coastal appeal for borders, pool decks, lanais, walkways, porches and more.
